Rosa Canet-Aviles, PhD – Date & Time tbd (CME Webinar); Vice President Scientific Programs at California Institute for Regenerative Medicine (CIRM)

Jeanne F. Loring, PhD – Date & Time tbd (CME Webinar); Professor Emeritus & Founding Dir., Center for Regenerative Medicine, Scripps Research Institute; *(continued on next page)*

Our Mission

Summit for Stem Cell Foundation's mission is to support, educate and raise awareness about the development of today's and tomorrow's evidence-based regenerative medical therapies focused on **Parkinson's disease** and other neurodegenerative disorders. It is our goal to empower patients and caregivers with information to elevate their understanding in order to manage their healthcare.

Our Programs

- Research Program
- Education Program
- Patient Support Program

APRIL'S CME WEBINAR: U.S. Businesses Selling Unlicensed "Stem Cell" Interventions: Ethical Issues and Regulatory Challenges

We are very excited to welcome Dr. Leigh Turner to our LIVE CME Webinar series on **Wednesday, April 13, 2022** (5:00-7:00pm PDT). This presentation will describe the contemporary U.S. marketplace for stem cell interventions and explore ethical issues and regulatory challenges related to the proliferation of U.S. companies and clinics selling putative stem cell treatments. The presentation will review recent enforcement actions and consider what steps regulatory bodies might take to more effectively respond to this troubling marketplace.

UPDATE: The Wellness Center for PD

We've been busy at Summit creating and launching our newest project: The Wellness Center for Parkinson's disease.

The vision for the Center is to provide a place where people with Parkinson's and their families and caretakers can be empowered with the tools, knowledge, and resources to live their best lives. We are working to raise funds, find collaborators, and engage professionals of like mind so we can begin helping people with Parkinson's as soon as possible. Program development has already begun with an experienced team of neurologists, scientists, and patient advocates. If you'd like to help, donate, sponsor, or volunteer - please let us know! info@SummitforStemCell.org

Health is a state of complete physical, mental and social well-being, and not merely the absence of disease and infirmity. Heave, W.H.O. (World Health Organization)
