

# About the Center for Parkinson's Well-being Capital Campaign

The cause is unknown. There is no cure. A diagnosis of PD is life changing.

Be a part of our team and join the effort for the Capital Campaign.

## THE NEED:

Physicians have limited time with patients. After evaluating their patient and delivering the diagnosis of PD diagnosis, physicians regrettably, do not have time to answer the flood of post-diagnostic questions. The Center for Parkinson's Well-being will serve as a **bridge between struggling with the disease and living with the disease.**

## PROTECT YOURSELF:

Protect yourself through our Education Program. Most people who are newly diagnosed with PD turn to the internet for information and find it difficult to separate fact from fiction. Many are **victimized by U.S. businesses making false promises of cure**, selling unlicensed and unproven stem cells products.

## THE CONCEPT:

Our innovative concept of The Center for Parkinson's Well-being (The Center for PD) is unique in the fact that nothing like it exists in the U.S. The Center for PD is to be **one location providing the latest** comprehensive programs, resources, and evidence-based information to people with Parkinson's disease, their families, and their caregivers.

## PROGRAMS:

Programs are already designed by leading experts on the Center's team addressing the mental, emotional, and physical impact of PD. Summit unites top Parkinson's community leaders with leading professionals in medicine, therapeutics, and research in a **collaborative effort to bridge the information gap.**

## HOW YOU CAN HELP:

**NOW is the time to change** the definition of what it is to have Parkinson's disease by learning to live with Parkinson's disease. The need is great. We encourage you to get involved and help make The Center for Parkinson's Well-being a reality. **We need YOU!!**

**Volunteer or DONATE TODAY.**
